# Counter & Agent Operations Manual (SOP)

Standard Operating Procedure for origin desk cash-in collection and destination payout counter cash disbursement across all Bantaba physical branches.

## 1. Cash-In Procedure (Origin Counter: China, UK, US)

1. **Identify Sender:** Request government-issued physical ID (Passport, National ID, or Resident Permit). Verify identity against active watchlist database.
2. **Count & Authenticate Physical Cash:** Run all banknotes through the UV/MG note counter machine. Reject damaged or suspicious bills.
3. **Input Transfer Details:** Log sender name, sender phone, destination country/corridor, recipient name, and recipient mobile number into the Bantaba OS Cash Desk.
4. **Confirm Exchange Rate & Fee:** Display total payout amount and flat fee to sender. Confirm acceptance before locking rate.
5. **Issue Redemption Slip:** Print two thermal receipt slips. Senders sign one copy for branch records; give the second slip containing the 10-digit code (`BNT-XXXX-XX`) to the sender.

## 2. Cash-Out Procedure (Payout Counter: Senegambia, Mali, Guinea)

1. **Receive Redemption Code:** Recipient provides the 10-digit redemption code and recipient phone number.
2. **System Lookup & Verification:** Cashier enters code into Payout Counter tab. Verify that the registered recipient phone number matches the customer present.
3. **Physical ID Verification:** Inspect recipient's physical ID (National Voters Card, Passport, or Driver's License). Record ID type and ID number in the OS verification panel.
4. **Disburse Cash:** Count destination currency bills twice. Hand cash to recipient along with a signed payout disbursement slip.
5. **Complete Ledger Posting:** Click *"Confirm Identity & Release Cash"* in the OS to mark the code as REDEEMED and debit the vault float ledger.

## 3. Exception Handling & Security Controls

| Scenario | Action Protocol |
|---|---|
| **Phone Number Mismatch** | Refuse cash release. Escalate to Supervisor to re-verify with origin sender. |
| **Code Already Redeemed** | Flag transaction in OS as potential fraud. Contact Compliance officer immediately. |
| **Insufficient Branch Float** | Initiate Vault Top-Up request in Treasury tab before attempting transaction. |
